General information

BMW recommends that you only use parts and accessory products that have been tested and approved by BMW in terms of their safety, function and suitability.

If you have any questions about operation, please contact the BMW Link support team, see Page 13. They will be happy to help you.

Remarks on the operating instructions

These operating instructions will familiarise you with BMW Link’s special applications. You will find information on how to operate them, which will allow you to quickly make optimum use of all the functions. These operating instructions describe all the BMW Link functions offered. There are therefore also descriptions of functions that are not available due to the car’s equipment variant or the scope of the selected BMW Link app. This applies to functions and systems of relevance to safety too. Additional information can be found in the iPhone operating instructions and the documentation supplied with the car.

Functions

• Large icons and an optimised font enable convenient operation in the car.
• All the BMW Link functions can be used in landscape format.
• Selected services from BMW ConnectedDrive, such as Roadside Assistance or Google Local Search.
• Fully-integrated navigation function.

Requirements

• Apple iPhone™: 3GS or 4, with iOS 4.2 or more recent, subsequently referred to as iPhone.
• Internet connection.
Additional costs may be incurred for data services if applicable.

Conditions of use

The conditions of use for BMW Link are stored in the AppStore from where they can be viewed.

Symbols used

⚠ Denotes instructions or warnings that you must observe.

• Denotes the end of the instruction.

 GLFW Denotes a movement that must be completed in the direction indicated by the arrow.

“...” Denotes text on the display for selecting functions.
Safety instructions

Safety at the wheel

⚠️ Only input data or values when it will not distract you from what is happening on the road. Otherwise the resulting distraction can place the passengers and other road users in danger.

BMW Station for the Apple iPhone™

⚠️ Set landscape format when driving. The vertical display setting can impair the driver’s field of vision and is not permitted in all countries. Observe the respective country regulations.

The BMW Station, an in-car cradle for the iPhone, was specially developed for car models without a display and promotes convenient and safe operation of the iPhone by:

• connecting the iPhone to the car’s audio system without visible cables
• positioning the iPhone in the driver's field of vision
• display in landscape format
• integrated hands-free kit with directional microphone
• radio silencing
• charge function for the iPhone
• automatically storing the vehicle's location when the iPhone is removed

Your service team will provide you with information outlining which cars the BMW Station is available for.

Configuring

Settings in the iPhone menu

Settings for the BMW Link app can be made in the iPhone’s “Settings” menu.

1. Select “Settings” in the iPhone.

<table>
<thead>
<tr>
<th>Settings</th>
</tr>
</thead>
<tbody>
<tr>
<td>Mail, Contacts, Calendars ➤</td>
</tr>
<tr>
<td>Phone ➤</td>
</tr>
<tr>
<td>Safari ➤</td>
</tr>
<tr>
<td>Messages ➤</td>
</tr>
</tbody>
</table>

2. “BMW Link”

Setting up the mailbox

1. “Mailbox”
2. Enter the mailbox number.
Operating principle

Starting BMW Link

The main menu or the last screen selected in the menu is displayed.

All the BMW Link functions can be called up via the main menu.

Switching between screens

Select the menu item you want.

After a menu item, e.g. “Music”, is selected, the corresponding screen is displayed.

Returning to the main menu

Drag tab 1 to the right.

To switch from the navigation system to the main menu, select key 1.
In the map view, the key 1 is located within the map.

Returning to the previous screen

Select key 1 to return to the next screen up, e.g. “Music”.

Incoming call

If you have an incoming call, the iPhone’s telephone menu is displayed automatically. The display switches back to BMW Link after the call is ended or cancelled.
Connecting up the iPhone in the vehicle

With the BMW Station

The BMW Station enables optimum use of the BMW Link app in the car, also see Page 5.

Registering the iPhone

⚠️ Only register the iPhone when the car is at a standstill. Otherwise the resulting distraction can endanger the passengers and other road users.

The iPhone only has to be registered once to connect it to the car via the BMW Station.
1. Switch on the ignition.
2. Place the iPhone in the BMW Station.
3. Activate Bluetooth on the iPhone.
   A list of the devices found is displayed.
4. Select “BMW Station” from the list.
5. Enter the PIN code “1234”.
6. “Connect”
7. The Bluetooth connection is established automatically if the iPhone was registered successfully.

Up to eight iPhones can be registered on the BMW Station.

Once registered, a connection to the car is automatically and quickly established when you place the iPhone in the BMW Station.
If other iPhones were previously connected to the BMW Station, you may have to deactivate Bluetooth on the devices that were last connected so the new iPhone to be connected is detected by the BMW Station.

Without the BMW Station

Please refer to the documentation supplied with the car for information on how to connect the iPhone to the car without the BMW Station.

Operating the music menu

Principle

BMW Link accesses the music library on the iPhone.

Playing music

The music menu is operated in the same way as on the iPhone.

1. “Music”
2. Select the category you want, e.g. Genre or Artists.
   All the entries are displayed in a list.
3. Select further categories if necessary.
4. Start playback.

Browse key

The Browse key is displayed if music tracks are being played and you switch back to the Music menu from another menu.

“Browse”: return to the music library
Operating the telephone menu

Only input data or values when it will not distract you from what is happening on the road. As the driver, you must not make or receive calls with the iPhone in your hand whilst the car is in motion. You should use the hands-free kit instead. Otherwise the resulting distraction can place the passengers and other road users in danger.

For information about incoming calls, see Page 6.

Overview

“Telephone”

The telephone menu is displayed.

Favourites

The favourites list in BMW Link is an independent list and does not access the data contained in the iPhone’s favourites list.

Adding favourites

1. “Favourites”
2. “Edit”
3. Select the + symbol.
   A list with the contact details saved in the iPhone is displayed.
4. Select the contact you want.
5. Dial the phone number you want.
The phone number is added to the favourites list.
6. “Done”: return to the telephone menu

Number

The numerical keypad for manual dialling is displayed.
The phone number is entered and dialled in the same way as when using the iPhone menu.

Making a call

If a connection is established, BMW Link automatically switches to the iPhone telephone menu and an option screen for returning to BMW Link during the call is displayed.

“Close”: BMW Link is closed and the iPhone telephone menu opened automatically.

“BMW Link app”: return to BMW Link during the call.

Ending a call

Calls can only be ended in the iPhone telephone menu.

If BMW Link is opened during the call, you must switch to the iPhone telephone menu to end it.
1. Press the home key on the iPhone.
2. Start the iPhone telephone menu.
3. End the call
Restart the app to return to BMW Link.
Operating the telephone menu

Contacts

BMW Link accesses the contact details on the iPhone.

The contacts stored in the address book are listed in alphabetical order.

To display contact details or establish a telephone connection, proceed as you would if using the iPhone menu.

Selecting a contact as a navigation destination

If an address is stored in the contact details and the location recorded in the navigation details, you can get route directions to this address.

1. Select the address in the contact details.
   If several locations with similar address details are stored in the navigation system, a list with the potential destination addresses is displayed.
2. Select the destination address you want from the list if necessary.

The route is calculated and indicated on the display. Please refer to the navigation operating instructions to start route directions and select other route directions functions.

Mailbox

The mailbox number must be set up in the iPhone settings in order to listen to messages, see Page 5.

Operating ConnectedDrive

Principle

ConnectedDrive makes selected services available. The exact range of services varies from one country to the next.

The navigation system must be available for certain services. A GPS signal must be received to determine the current position, also see Page 6.

“ConnectedDrive”

The list of available services is displayed.

Accident hotline

If you require assistance in the event of an accident, you can contact the BMW accident hotline. The phone number displayed is determined by the country setting selected in the iPhone settings, see the iPhone operating instructions. If Germany is selected, a connection to the German BMW accident hotline is always established, even if you are abroad.

1. “ConnectedDrive”
2. “Accident hotline”
   The phone number of the emergency hotline and the last available position are displayed.
3. “Call accident hotline”
   A connection is established.
Operating ConnectedDrive

Google™ Local Search

Search for special destinations, e. g. hotels or sights.

1. “ConnectedDrive”
2. “Google Local Search”

3. “Different location” if necessary: change the search location.
   • “Current position”
   • “Navigation destination”
   • “Different location”: enter the search location you want manually.
4. Enter the search term.
5. “Search”
   A list of the special destinations is displayed.

Starting route directions

Select the destination address you want. The route is calculated and indicated on the display. Please refer to the navigation operating instructions to start route directions and select other route directions functions.

Car-finder

To find particular locations again later on, e. g. the current position of the car, save the location before you leave the car. The saved position can be displayed and navigation to the car’s location started via the car-finder.

Saving the position with the BMW Station

If the iPhone is connected to the car via the BMW Station and BMW Link is active, the current position is automatically saved when the iPhone is removed.

Saving the position manually

1. “ConnectedDrive”
2. “Car-finder”
3. “Save current position” The current position is saved and then displayed.

Only one position can be displayed at any given time.

Options

- “View in map”: view the saved position in the map.
- “Navigation”: the route to the saved position is calculated and indicated on the display. Please refer to the navigation operating instructions to
Operating ConnectedDrive

start route directions and select other route directions functions if necessary.

Weather

1. “ConnectedDrive”
2. “Weather”

Weather information for the current position or, if route directions is active, the destination location is displayed.

Options
• “Forecast”: weather information for the next three days is displayed.
• “Previous search”: the last search locations entered are displayed and can be called up again.
• “From address book”: weather information for an address from the list of contacts is displayed.
• “Different location”: change the search location.
Select one of the following options:
• “Current position”
• “Navigation destination”
• “Different location”: enter the search location you want manually.

News

View current news, such as sports news or top stories.

1. “ConnectedDrive”
2. “News”
3. Select the category you want.
   A list of headlines is displayed.
4. Select the headline you want.
   Detailed news is displayed.

Panoramio

Images can be displayed for selected locations.

1. “ConnectedDrive”
2. “Panoramio”
   A list of available images for the current position or, if route directions is active, the destination location is displayed.
3. “Different location” if necessary: change the search location.
Select one of the following options:
• “Current position”
• “Navigation destination”
• “Different location”: enter the search location you want manually.
4. Select the image you want.

Options
• Full-screen mode: tap the image.
• Display the next or previous photo: drag your finger across the screen to the right or left.
• Show the operating elements again: tap the image in full-screen mode.
• “Panoramio”: return to the list of available images.
Operating ConnectedDrive

Roadside Assistance

Contact the BMW Group Mobile Service if you need assistance in the event of a breakdown.

The phone number displayed is determined by the country setting selected in the iPhone settings, see the iPhone operating instructions. If Germany is selected, a connection to the BMW Group Mobile Service in Germany is always established, even if you are abroad.

1. “ConnectedDrive”
2. “Roadside Assistance”
   The phone number of the Roadside Assistance team and the last available position are displayed.
3. “Call Roadside Assistance”
   A connection is established.

Navigation

Activating the navigation function

A BMW Link ID is required to use the navigation system. The BMW Link ID is made up of your personal e-mail address and a password at least six characters long and defined by you.

1. “Navigation”
2. “Test now” or “Purchase navigation”
3. “Create a BMW Link ID”
4. Enter your e-mail address and password.
5. If activation was successful:
   “Continue to BMW Link”
6. Adapt settings if necessary.
   In the settings, you can select the language, voice and measurement unit for the navigation system.
   The navigation menu is displayed once activation is complete.

Please refer to the navigation operating instructions for operation and other possible settings.

Test version

The first time the BMW Link app is downloaded, the navigation system can be used free of charge for a maximum of 30 days. The navigation system and additional functions for traffic reports be purchased via In-App Purchase.

The App Purchase option must be activated in the iPhone settings, see the iPhone operating instructions.
Help

Information about BMW Link

Select the symbol in the start display.

A list of the available information is displayed.

FAQ

A list of frequently asked questions and the corresponding answers can be requested.

User information

Operating instructions for BMW Link can be requested.

Support

Requests for support can be sent via an integrated e-mail function. If the request is sent directly from the iPhone via the support function, a diagnostic code is generated automatically.

Diagnostic

If a support request is sent e.g. via a PC, we would recommend generating a diagnostic code. “Generate diagnostic code”: the diagnostic code is generated and automatically displayed.
Navigation
BMW Link

User Manual
Draft: 20 April 2011
Getting started

Starting Up

Tap the Navigation button within the BMW Link menu.

You can return to the BMW Link menu at anytime, by tapping Home in the navigation screen or Main Menu.

First time setup

The first time you launch BMW Link Navigation, you will be asked to create or enter an existing BMW Link ID to get started.

BMW Link ID

What's a BMW Link ID?

Create a BMW Link ID and use it to manage your BMW Link Navigation and purchase extras in-app.

Create a BMW Link ID

- Enter an email address as your BMW Link ID and then create a secure password that you can also remember.
- Tap Continue.

Use existing BMW Link ID

- If you already have a BMW Link ID, enter the email address and password of your existing BMW Link ID.
Customise your settings

The first time you launch BMW Link Navigation on your phone, you will be asked to customise your settings.

- Select Yes, to customise now
- Tap No, to skip customisation

If you chose Yes to customise your settings now, you can:

- Choose your preferred language for on-screen text and voice guidance.
- Select a voice for spoken instructions. Tap Next to use a pre-installed voice, tap Download (if available) to get an additional voice or Test to hear a sample of your chosen voice.
- Choose between Imperial and Metric for the unit of measurement used in maps and instructions. (Imperial = Miles, Metric = Kilometres)
Finding your way around the BMW Link Navigation Menus

Every time you start Navigation, the guidance view is displayed.

Tap at any time to bring up the Driving Menu or Walking Menu depending on how you are travelling.

Driving Menu

A quick menu to the key features you'll need when on the move. The features shown may vary depending on your mode of travel.

2D/3DMap - choose between a 2D or 3D map perspective

Directions - shows you large, clear text only directions. You can toggle between a large next turn view and a list of upcoming turns by pressing the large turn arrow at the bottom of the screen.

Tip: BMW Link can also switch to a map view when you are close to a turn. See Map Options in the Settings menu.

Detour - calculates an alternative route to guide you to your destination

Find POIs - BMW Link has thousands of useful Points of Interest (POIs) installed as standard. It makes it easy to search and find the nearest petrol station, hotel, restaurant and much more

My Route - shows you the best possible route for your journey, lets you calculate an alternative route to the one planned or add a stop

Walk - switch to walking mode

Main Menu access all of BMW Link’s navigation controls, including destination entry, route features and settings
Walking Menu

A quick menu to the features you'll need most when walking

Find POIs - BMW Link has thousands of useful Points of Interest (POIs) installed as standard

My Route – adjust your route, add a stop or find an alternative way to your destination.

Drive - switch to driving mode

Main Menu – access all of BMW Link’s navigation controls, including destination entry, route features and settings

Main menu

In the main menu, use the series of tabs at the bottom of the screen to access the submenus.

Scroll to see the features, services, options or items available in each tab.

Tap on an item to get started or see more options.

The following submenu tabs are available:

Home - tap this tab to return to the BMW Link menu

Go To - enter a destination using Address, Points of Interest, Contact and more

Route - plan a journey, check or change your route, set your mode of travel and more

My BMW - buy additional content and manage your BMW Link ID

Settings - adjust your navigation settings to best suit your personal preferences
Your first journey

Start your journey to new and familiar places with your BMW Link here.

Entering a destination

There’s a variety of ways that you can enter a destination.

In the Go To menu, you can choose from the following destination entry options:

- Address
- My Places
- Points of Interest
- Contact
- Browse Map
- PhotoNav
- Coordinates
Address

- In the main menu, tap Go To > My Places
- Tap Address
- Start to type the city, town name or postcode of the destination
- As you type, the names of cities or towns that match what you have entered will be displayed. When the name of the place you want to go to appears in the list, tap it to set it as your destination.

Tip: ‘Copy and paste’ to enter an address
You can copy an address from within a text, email, webpage or even another app and paste the details directly into your BMW Link. Just tap and hold to paste parts of an address or the full address into the Enter City or Postcode box.

- Start to type the street name. The names of streets that match those found within the city or town name you selected above will be displayed. When the name of the street that you want to go to appears in the list, tap it to set the street as your destination.
- Enter the house number and tap it to set it as your destination.
  You can also choose to skip this step and go to the town or city centre, or select a cross street to navigate to an intersection.
- Tap GO to begin navigating.
My Places

With My Places you can navigate to frequently visited locations including your Home, Work, Favourites and Recent places.

Home

Enter your home address and save it as one of your favourite locations so that you can enter it quickly every time you want to plan a journey to and from your home.

- In the main menu, tap Go To > My Places
- Select the Favourites tab
- Tap the Home button

The easiest way to enter your home address is by choosing Address.

- Enter the city, street name and house number of where you live. After that, you’re done.

Tip: If you’re already at home, then choose Current Location to save your home address with one tap of a button. A GPS fix is required.

Your home address will be saved in your Favourites list.

- Tap Go To > My Places > Home anytime you want to plan a route to or from home more easily.
Work

Save your Work address to give you a quick and easy way to navigate to your work place.

- In the Go To menu, select My Places
- Select the Favourites tab
- Tap the Work button

You can save your work address in the same way as entering your Home address.

- Tap Address. Enter the city, street name and number of where you work.

Your work address will be saved in your Favourites list.

- Tap Go To > My Places > Work anytime you want to plan a route to or from your work location.

Favourites

Favourites are places that you like to visit over and over again.

You can create Favourites, so that you can return to your favourite restaurant, shop or place more easily, every time you want to go back there.

Create a Favourite

- In the map view, tap on any town or city, road, Point of Interest or destination flag on the map.
  
  An info box will show the location on the map.

- Tap 📍 on the info box to bring up location options

- Select Add to favourites to save the destination as a Favourite

  The destination will be saved in your Favourites list.
**Navigate to a Favourite**

Once you’ve saved a destination as a favourite, it’s easy to navigate there next time.

Here’s how:

- In the **Go To** menu, select **My Places**
- Tap **Favourites**
- Select a **Favourite** from the list.
- Tap **GO** to begin navigating there.

**Manage your Favourites**

You can edit a location saved in your Favourites list:

- Tap **Edit**.

- Select the Favourite you want to edit then tap **Edit**.
- You can enter a name for the Favourite and set it as your **Home**, **Work** or **Other** location.

**To delete a Favourites**

- Tap **Edit**.

- Select the Favourite you want to delete then tap **Delete**.
- Tap **Yes** to delete the favourite, tap **No** to keep it saved in your favourites list.
Recent

BMW Link remembers all the places you have recently been to so that you can return to those places more easily, every time you want to go back.

- In the main menu, tap **Go To > My Places**
- Tap **Recent** to select a location from a list of places you have recently visited.
- Tap **GO** and you’ll be on your way back there.

Note: Only the last 50 places you visited will be saved in your **Recent** places list.

Manage your recent places

To delete your recent places list, tap **Clear All**.

You can save one of your recent destinations as a favourite location:

- Select a **Recent** location from the list.
- Tap 🌟 to add it to your **Favourite** places list.

Current location

BMW Link can save your current location as a destination so that you can find your way back there later.

- In the **Go To** menu, select **Current Location**
  
  Your current location will be saved in your **Recent** places list.

- When you are ready to go back, tap **My Places > Recent** and select the place that you want to revisit from the list.
Contacts

With BMW Link, you can navigate to one of the contacts saved in your phone’s address book.

- In the **Go To** menu, select **Contacts**
- Start to type the name of a contact saved in your phone’s address book.
- Select the name of the person you want to visit when their name appears in the list.
- Tap **GO**.

Note: Your BMW Link may ask you to enter the city, street name and house number for a contact if the address saved in your address book is not correctly recognised.

Points of Interest

Whether you’re running low on fuel, looking for a place to eat, or somewhere to stay, BMW Link can help you find it. You can search thousands of Points of Interest (POIs) like ATMs, restaurants, petrol stations and car parks.

**Navigate to a POI**

To set a POI as a destination, do the following:

- In the **Go To** menu, select **Points of Interest**.

  The most frequently used Points of Interest (POI) categories will be displayed:

  - **Restaurant**
  - **Hotel**
  - **Petrol station**

To find additional types of POIs, tap **More Categories** or **Search All**

A list of nearby POIs will be displayed.

You can also type the name of a specific POI in the Search box.

Select **Map** to view POI search results on the map.
You can also search for POIs in a different location. Tap on **Search Nearby** at the top of the screen and choose from:

- **Nearby** - to find POIs that are close to your current location
- **On My Route** - to find POIs along your route
- **In Different City** – for POIs in a certain city or town

Select a POI from the list.

You can choose to:

- **Add to favourites** – to save the POI as a Favourite
- **Set as destination** – to enter the POI as your destination
- **Show Map** – view the POI location on the map

You may also be able to dial the POI directly from a phone-enabled mobile device if a telephone number is displayed

### Browse Map

Find any location on the map and tap it to enter it as a destination.

- In the **Go To** menu, tap **Browse Map**
- Drag the map to pan, or pinch the map to zoom in or out, until you find your destination.
- Tap the location on the map.
  
  An info box will show the location on the map.
  
- Tap 💬 on the info box to bring up location options.
- Tap **Set Destination**
- Tap **GO** to start navigating there
**PhotoNav**

*When you* take a photo using the GPS enabled camera on your phone, it captures both the moment and your exact location, so that you can use your BMW Link to navigate back there.

- Take a photo with your phone’s GPS enabled camera.

  When you take a photo, your phone uses GPS to record your exact position and other geo tagged information which is stored with the photo.

*Note: Follow the instructions that came with your phone.*

- In the **Go To** menu, tap **PhotoNav**.

- All your geo-tagged photographs will be shown in a list.

- Tap a picture in the list.

  BMW Link will display the location on a map together with the GPS coordinates and a photo thumbnail.

- Tap **GO** to begin navigating there.

**Coordinates**

Use coordinates to enter a specific location as a destination to find your way to any place.

- In the **Go To** menu, tap **Coordinates**.

  You can enter a destination using coordinates in two ways:

  - **Decimal Degrees**
  - **Ordnance Survey Grid**

- Enter the latitude and longitude values in the format that you are asked for and then tap **Next**.

- Tap **GO** to begin navigating there.
Planning a journey in advance

Your CoPilot Live lets you plan a journey from start to finish with as many destinations and waypoints as you like.

Important: For safety reasons, always plan your journey before you start driving and ensure that your device is securely mounted.

Enter multiple destinations

BMW Link lets you plan a journey with multiple destinations. Here’s how:

- In the main menu, tap Route.
- Tap Plan or Edit Trip.
- To enter a destination, tap Add Stop.
- Tap Address. Enter the city, street name and house number of the address.
- Tap Add Stop again to add additional addresses.

Change the order of your destinations

If you’re planning a journey with multiple destinations, you can change the order you want to visit each location.

- Select the destination you wish to move.
  A pop-up menu will display a list of options.
- To move the stop, tap the Move Up, Move Down, Move to Start or Move to End button, until the stop appears in the position you need in the trip list.
Show on Map

You can view any of the destinations you’re planning on going to on a map:

- Select a destination from the list.
- Tap **Show on Map** to display the destination on the map.

To return to the Plan or Edit trip list, tap **Back**.

Create Waypoints

BMW Link can route you through a specific place without considering it as a stop. By setting Waypoints you can adjust BMW Link’s route, to calculate a detour via the waypoint.

**Note:** A stop is a specific destination in your itinerary that BMW Link will provide guidance to. A waypoint is simply a location that you want to be routed through, it is not treated as a Stop in BMW Link for route optimisation or for estimated time of arrival.

- Select the destination you want to change to a Waypoint.
  
  A pop-up menu will display a list of options.
  
- Tap **Set as Waypoint**.
  
- The address will now be set as a Waypoint, the arrow next to it will also change to white to indicate that it is a Waypoint.

To change a Waypoint back to a Stop, select the destination and choose **Set as Stop** from the pop-up menu.
Save as Favourites

You can save destinations listed in your Plan Trip list as Favourites, so that you can easily return to those places.

- Select the destination that you wish to save as a Favourite.
  
  A pop-up menu will display a list of options.

- Tap **Add to Favourites**.
  
  The address will be saved in your Favourites list.

Delete a destination

Once you’ve entered a destination, you can always delete it from your itinerary if you no longer wish to go there.

- Select the destination you want to delete.
  
  A pop-up menu will appear containing a list of options.

- Tap ✖️ to remove the selected destination from the list.

- Select **Yes** to delete the destination, tap **No** to keep it in the list.
Advanced trip planning

Your BMW Link has additional trip planning functions that can help you plan your journey more effectively. From optimising your route, to saving a trip, your BMW Link can help.

In the Plan or Edit Trip screen, tap **Options**.

The following options are available:

**Clear**

You can delete all the destinations in your Plan Trip list.

- Tap **Clear**
  - Select **Yes** to confirm, otherwise tap **No**.

**Save**

For any trips that you make regularly, it’s worth saving those trips so that you can access them any time you need to make the same trip.

- Tap **Save**.
  - Enter a name for the trip and tap **Save**.

**Load**

If you’ve already saved a trip, you can re-load it easily any time you want to make it.

- Tap **Load**.
  - Select the trip that you would like to load from the list and then tap **Open**.

To remove the saved trip, tap **Delete**.
Optimise Stops

If your trip contains 3 or more stops, you can use BMW Link’s powerful trip optimiser technology to calculate the best way around multiple destinations. Simply enter all of the places you want to visit for your journey and let BMW Link re-order them into the most efficient route.

- Tap **Optimise Stops**.

- BMW Link will reorder all of your stops to give you the most efficient route for your journey.
My Route

BMW Link makes it easy to find the best way to your destination.

Once you have entered a destination, BMW Link will calculate a route there based on your current location (or starting point if you are using Plan or Edit Trip).

You can see the route that your BMW Link has created for your journey on a map along with an info box about your destination. The roads for your route will be highlighted in white. Your current location or starting point is indicated with a green flag, your end destination is indicated with a red flag. The total distance and estimated journey is shown at the bottom of the My Route screen.

Tap on the info box to view more details about that location, add it to favourites list, edit the trip or delete the destination.

If you are happy with the route provided, tap GO to start navigating to your destination.
Alternate routes

Tap **Alternates** to view up to 3 possible routes to your destination.

The different routes are colour coded according to the roads used plus the distance and journey time for each.

Simply tap on the route you want to take and tap **GO** to be guided to your destination using that route.

---

Drag Route

With **BMW Link** you can drag a route to change it and create the exact route that you want.

- In the My Route screen, select the **Drag Route** button found in the top right of the screen.

- Using your finger, select the route and drag the white line to customise your route to suit you.

  While you’re dragging, you’ll see the route change with a blue dashed line and Waypoints will be added along your route. Keep dragging until you’re happy with the selection. BMW Link will automatically calculate a new route and update the distance and estimated journey time.

- Once you are happy with the new route, tap **GO** to start navigating.
Drag the Destination

Now you can tap and drag to change the location of the destinations along your route.

- In the My Route screen, select the Drag Route button.

- Using your finger, select and drag the destination flag from its current position to a new location on the map.

  As you drag, a blue dashed line shows the previous position of your destination to its new one, together with the name of the road that you moved the destination flag to.

- Once you are satisfied with the new location, tap GO to start navigating.

If you make a mistake or want to cancel the new destination, simply tap on the destination info box and select Delete.
Route Options

Tap the Options button in the bottom left of the My Route screen to further customise your route and access trip preview features.

- **Vehicle Preferences** allows you to change your mode of travel and choose relevant route preferences.
- **Route Demo** plays a simulation of your entire journey
- **View Turn Maps** lets you scroll through all the turns for your trip
- **View Turn List** shows a list of all of the turn instructions for your trip
Mode of Travel

BMW Link works out the best route to your destination depending on whether you're driving or travelling by foot.

Vehicle Preferences

You can adjust how your BMW Link calculates routes based on the vehicle you’re driving.

- In the main menu, tap **Route**
- Tap **Vehicle Preferences**
- Select your vehicle type, choose from **Car, RV** (Recreational Vehicle), **Motorcycle, Bicycle** or **Walking**.
- **Toll Road**: Choose to **Use**, **Avoid if Possible** or **Always Avoid** toll roads along your route.
  This option is not available for bicycles or walking.
- **Congestion** - Set your BMW Link to **Avoid** or **Allow** congestion charge zones, or to **Warn when driving** through one.
  This option is not available for bicycles or walking.
- **Avoid Ferries** – Tick the box to **Avoid Ferries** along your route where possible
- **Scenic Route**: Tick the box to be guided along a route with scenic surroundings.
- **Custom Road Speeds** – The ultimate in personal route settings. You can choose to favour or bias against specific road types and allocate a personal speed setting for each. For each road type, first set BMW Link to **Strongly Avoid**, **Avoid**, stay **Neutral**, **Favour** or **Strongly Favour** certain roads when calculating routes, then set your preferred speed for each one.
  This option is not available for bicycles or walking.
An icon will be displayed in the dashboard to show you the mode of travel you've selected.
Guidance Display

BMW Link gives you a choice of guidance views that make it easy to see which way you need to go. There's a variety of ways to customise the display, including the trip status and the map perspective.

Once you've entered a destination and tapped **GO**, you'll be at the map view.

Driving

The standard BMW Link driving view provides a 3D perspective of the road ahead. Details about the next turn are shown on the dashboard at the bottom of the screen, with a description of the turn, a large turn arrow and the distance to the turn.

Lane assist arrows are displayed at the top of the screen when you approach a complex junction. Sign post information is displayed at major intersections that match real-life signs.

Driving views

There's a choice of driving views available from the Driving Menu:

- **3D Map** – displays your current position, next turn and route ahead on a 3D map
- **2D Map** – shows your current position, next turn and route ahead on a 2D map
- **Directions** – This view lets you see your next turn in full screen view or you can choose to see your next turn in a large display together with a complete itinerary of your entire journey.

Here's how to switch between the single turn instruction and a list of directions:

- Tap **on the dashboard to view your next turn instruction in full screen view**
- Tap **to see all roads, turn instructions and distances to each turn displayed in a list**
A closer look at the driving view

1. Zoom-out from the map
2. Real sign post display
3. Lane assist arrows
4. My Current location
5. Current route
6. My current position/direction
7. Menu button
8. Customisable info display - left
9. Next turn instruction
10. Zoom-in on the map
11. Safety camera display/alert
12. Speed limit display/alert
13. Turn-after-turn indicator
14. Next turn distance and direction
15. Mode of travel
16. GPS status indicator
17. On-screen help
18. Customisable info display – right

Zoom in and out of the map

To zoom in and out of the map either pinch the map with two fingers or tap the + and - buttons at the top of the map display.

Drag the map to pan

You can move around the map by dragging up, down, left, or right.
Customisable information displays

Two additional information displays are shown on the lower left and right hand side of the dashboard, providing useful information such as estimated time of arrival and distance to destination. You can tap on either of these to choose what information you would like shown, including:

- Distance
- ETA (Estimated Time of Arrival)
- Time Remaining to reach your destination
- Current Speed
- Current Altitude
- Heading

Turn-after-turn display

A small turn indicator is displayed above the large Next Turn indicator for situations when you need to make two turns in quick succession.

My Current Location

If you drag the map away from your current location or route, the My Current Location button will appear on the middle left of the screen. Tap to snap the map back to your current location.

Note this feature only functions if you have GPS fix

Speed limit alert

BMW Link can display the speed limit of the current road and warn you if you accidentally exceed it. You can adjust this feature in the Settings menu.

Note: This feature is not available in North America
Safety Camera Alert

BMW Link can warn you on the approach to a safety camera location, showing you the distance to the camera and the speed limit of the road. You can adjust this feature in the Settings menu.

Note: This feature is only available in Western Europe.

Driving Menu

Tap to access the Driving Menu. Here you can access the 2D, 3D or Directions map view, take a Detour, Find POIs, view or change My Route, switch to walking mode and access the Main Menu.
Walking

BMW Link is designed to help you find your way around on foot, making it easy to see exactly where you are and where you need to get to.

In walking mode, your location is displayed as a dot on-screen rather than a direction arrow. Once you have entered a destination, BMW Link will draw a dashed line there – just follow the line.

BMW Link also provides turn by turn directions along streets and footpaths where available in the map.

Walking Menu

Tap 📞 to bring up the Walking Menu to access the most commonly used features when walking. Here you can Find POIs, see or change My Route, switch to driving mode and access the Main Menu.
Map tools

Tap, GO and discover more

You can tap on any town or city, road or Point of Interest on the map to find out more information about the place and to add it as a destination. You can also see more information about the destinations you’ve entered, manage them and change your trip.

Here’s how:

- Tap on any town or city, road, POI or destination flag on the map
  An info box will show the location on the map.
- Tap on the info box to bring up location options
- Choose from the following options, where available:
  - Set Destination - to set the location as your destination
  - Add to favourites - to save the destination as a Favourite
  - Avoid this road - to find an alternative road to the one you have selected
  - Route through here - to be routed through the road you selected
  - Telephone number - if the phone number for a POI is available, you can call the place using your phone. For example, you may want to call a restaurant to reserve a table.
  - Hide category POIs – to choose not to display this category of POI on the map anymore
  - Delete - to remove the stop from your journey
  - Edit trip - let's you change the trip you've planned
On the move

Detour

Once you’ve started your journey, you may need to make a detour to reach your destination.

Find an alternative road

- Select the quick menu button then tap Detour.

You can also access this feature from the main menu, tap Route > Detour.

- When asked how much of your route ahead do you want to avoid?, choose from the different distance options:
  - 1 Mile/Kilometre
  - 2 Miles/Kilometres
  - 5 Miles/Kilometres
  - 10 Miles/Kilometres

- BMW Link will attempt to calculate an alternative route to avoid the section of the route based on the distance that you selected above.

- You can compare both routes on the map and view the distance and estimated journey for each one.
  - Select Current Route to use the original route
  - Select New Route to accept the detour

- If you’ve start travelling along the new route and something unexpected happens, you can return to your original route by selecting Detour then Cancel Detour.

Note: BMW Link can only calculate a detour when suitable alternative routes exist.
Find an alternative road

Your route may use a particular road that you would prefer to avoid.

There are two ways you can do this:

1. **Tap on the map to avoid a road**
   - Browse the map to find the road on your route that you wish to avoid.
   - Tap the road. An info box will be displayed.
   - Tap on the info box to bring up location options for this road.
   - Select **Avoid This Road**.
   - BMW Link will attempt to calculate an alternative route, and the original road will be shown in red on the map to indicate that you have chosen to avoid it.
   - If you change your mind and decide you want to use the road after all, tap the road again and select **Allow This Road**.

2. **Avoid a road from the Directions view**
   You can easily choose to avoid a road from the Directions guidance view.
   - Select **Directions** in the Driving Menu.
     A turn-by-turn list of all the roads on your journey will be displayed
   - Select the road you want to avoid and tap **Yes** to confirm.
   - You can compare both routes on the map, and view the distance and estimated journey time for each one.
     - Select **Current Route** to use the original route
     - Select **New Route** to accept the detour
   - You can return to your original route by selecting **Detour** then **Cancel Detour**.
Clear Destination

You can clear your current destination and stop receiving turn by turn guidance.

- In the Main menu, tap Route.
- Tap Clear Destination.
- When asked are you sure? tap Yes.

This will clear all destinations and waypoints from your trip. You can return to the map view to monitor your current location by selecting the Map button in the top left of the screen.
At your Destination

Now Arriving

As you approach your destination, BMW Link will display the **Now Arriving** popup.

You can choose from the following options:

🌟 To save the destination as one of your Favourite locations

❌ Clears your current destination
Info

Features and upgrades

You can review all the standard features in your BMW Link Navigation, together with all the great extra features and services also available, all on one simple screen.

- In the main menu, tap **Info**.
- Tap **Features and Upgrades**.
- A list of features will be displayed. You can also see more detail about each feature and a small icon next to it showing you the current status of the feature.

<table>
<thead>
<tr>
<th>Status icons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Green</td>
<td>This icon is shown when you’re licensed for a feature, service or subscription</td>
</tr>
<tr>
<td>Red</td>
<td>This icon shows you any additional features, services or subscriptions that are available for you to purchase from with the BMW Link app</td>
</tr>
<tr>
<td>Blue</td>
<td>The restore icon lets you re-download any feature(s) you have already purchased from with the app again for free</td>
</tr>
</tbody>
</table>

How to purchase extra content

You can purchase extra content for your BMW Link from within the app.

- Choose the feature or service you wish to purchase from the list
- Tap **Buy**
  
  Once you tap **Buy**, you’ll be required to create or enter your **BMW Link ID** to continue with the purchase.
- You will be asked to confirm your in app purchase, tap **Buy**.
- Enter your iTunes Store account password to complete the purchase.
My BMW Link ID

To change your BMW Link ID name or password:

- In the main menu, tap **Info > My BMW Link ID**
- Tap **Edit**.
- Enter a new **email address** for your **BMW Link ID**.
- Create a new and secure **password** that you can also remember easily.
- Tap **Done** to save the changes.
Settings

You can change the way your BMW Link works and looks to suit you.

Tap Settings in the main menu.

Important: We recommend you only make changes to your BMW Link’s settings when you are stationary. It is dangerous and illegal to use your phone while you are driving.

Map options

Let’s you change the look and feel of the maps included with your BMW Link. You can also decide whether certain features like Points of Interest are shown in the map.

Tap Map Options

The following options are available:

Show Turn Restrictions - BMW Link can display a turn restriction sign in the map view to show you where any restricted turnings are along your route.

Show Walking Breadcrumb - When you’re making a journey on foot, BMW Link can guide you from your starting point to your end destination by displaying a dashed line for you to follow. A walking breadcrumb can be displayed in the map to show where you have walked.

2D Map Rotation - set the 2D map display as Heading Up to always display the road ahead facing upwards on the map or you can select Northup to always keep the map pointing North.

2D Auto Zoom - BMW Link will automatically zoom in to the map as you approach a turn. Here you can choose:

- To disable automatic zooming, tap Off.
- To re-enable automatic zooming in 2D view, tap Always Show Next Turn
- To show the route from your current position to your destination in 2D view, tap, Always show full route

Show POIs on Map - To set when to display POIs on the map.

Choose to show POIs Always, When Stopped or Never.

You can select which specific POI categories are shown on the map, by selecting Currently Displayed POIs.
**Map Styles** – Choose from a variety of map colour schemes and styles for the day and night.

**Day and Night Mode** - Set your BMW Link to use a Day or Night map style, or choose Automatic to switch between the day and night map styles you have selected.

Your BMW Link will automatically switch between day and night mode based on UTC time if available, or else it will use the time set on your phone’s clock.

**Guidance**

You can choose exactly how you’d like to be guided for every journey you make.

Tap **Settings > Guidance**

To show a map view on approach to a turn while in the Directions view, tap **Show Map in Directions View**.

You can also set how near to a turn you’d like to be before your BMW Link switches from the directions view to a map view. Choose one of these options:

<table>
<thead>
<tr>
<th>Metric (Miles)</th>
<th>Metric (Kilometres)</th>
</tr>
</thead>
<tbody>
<tr>
<td>Never</td>
<td>Never</td>
</tr>
<tr>
<td>1 mile from turn</td>
<td>2 kilometres</td>
</tr>
<tr>
<td>0.7 miles from turn</td>
<td>1 kilometre</td>
</tr>
<tr>
<td>0.5 miles from turn</td>
<td>500 metres</td>
</tr>
<tr>
<td>0.3 miles from turn</td>
<td></td>
</tr>
</tbody>
</table>

**Turn Warning Distances** lets you choose how far from a turn you wish to be before you receive a next turn instruction.

Choose from the following options:

- At 2 miles/2 kilometres
- At 1 mile/1 kilometre
- At 0.3 miles/0.5 kilometres
Turn after next turn distance

BMW Link can alert you if you need to make two turns in quick succession.

You can change the distance at which you’ll receive a turn after next turn instruction. Choose from:

- 0.2 miles/0.3 kilometres
- 0.3 miles/0.5 kilometres
- 0.5 miles/0.7 kilometres
- 0.7 miles/1 kilometres

To hear a spoken instruction when you need to make a turn, tap turn now announcement.

To change how near to a turn BMW Link provides the spoken turn now instruction, select one of the following options:

- Never
- 50 yards/metres
- 100 yards/metres
- 150 yards/metres
- 200 yards/metres
- 250 yards/metres
- 300 yards/metres
- 350 yards/metres
- 400 yards/metres
Background navigation

Your BMW Link can continue to provide you with turn-by-turn directions while you’re on a call or using another app on your iPhone.

To change the way your BMW Link works when minimised, tap **Background Navigation**.

You can select the following options:

**Disable/Enable Background Navigation** - If you enable background navigation, BMW Link will continue to run in the background when using other apps. If you disable background navigation, you will not receive guidance while you use using other apps.

**Turn GPS Off** - if you have enabled Background Navigation, you can set your BMW Link to automatically switch off GPS after a certain period of time to save power on your iPhone. Choose from: **5, 10, 15 and 20 minutes**.

**Display GPS Warning** - check this box if you would like to receive an on-screen warning before GPS is switched off to save power.

Show ClearTurn™

At some intersections and exits, BMW Link can display a more realistic image of the road layout with lane indicator arrows and real sign post information.

To switch ClearTurn on and off, tap **Show ClearTurn**.
Safety Alerts

Safety Alerts warn you when you are approaching a safety camera location.

BMW Link displays the location of the safety camera on a map and gives you a spoken warning.

You can change the way your BMW Link warns you about safety cameras, tap Settings > Safety Alerts.

Enable safety camera warnings

- Tap Display Safety Alerts to receive on-screen and spoken safety camera warnings.

Changing the warning distance

You can set how close to a safety camera location you want to be warned.

You have three distance options to choose from:

- 250 yards/metres ahead
- 500 yards/metres ahead
- 1,000 yards/metres ahead

Updating safety camera locations

BMW Link comes pre-installed with a database of thousands of safety camera locations across Western Europe.

The location of these safety cameras can change frequently and without any prior notice.

We recommend you regularly update the safety camera database so that you have the latest locations for alerts when you’re travelling.

*Available in Western Europe only. Safety camera locations are not available in Switzerland, and customers are advised to deactivate camera warnings completely when travelling in Switzerland to comply with local legislation.
Speed limit

BMW Link can display the speed limit of the road you are on and can warn you to slow down if you’re speed exceeds the maximum speed limit of the road.

To set the way your BMW Link warns you about speeds limits, tap **Settings > Speed Limit**.

**Note**: If the speed limit for the road you are on is available, it is shown next to your speed.

If you’re drive faster than the speed limit, your speed is shown in red.

- To display the speed limit in Driving Views, select **show speed limit**.

To set BMW Link to warn you if your speed exceeds the limit:

- Select **show warning when speed exceeds**

- Select a speed, above the speed limit of a road, to set when you would like to receive a warning

To hear an audible warning if you’re speed exceeds the limit, select **enable speed warning sound**.

Always respect the speed limit of a road and drive at a safe speed for conditions such as weather and traffic.

Different speed limits may apply to different types of vehicles travelling on a road.

Check the road speed limits set by a particular country before you start a journey.
Language and voice

You can change the language used for all buttons, information and instructions displayed on-screen and spoken by your BMW Link navigation.

Tap **Settings > Language & Voice.**

Change the language

BMW Link provides on-screen and voice guidance in a wide range of languages.

You can change the language used by your BMW Link navigation.

- Choose a language from the list.

Choose a voice

Once you have selected a language, you can then choose the voice you want to use.

Select a voice from the list.

You can:

- Select **Test** to hear a sample of your chosen voice.
- Press **Download** (if available) to download the selected voice to your phone.

Your BMW Link has two different kinds of voices:

Standard voice – Provides pre-recorded spoken instructions such as ‘Just Ahead Turn Right.’

Text To Speech (TTS) voice. TTS provides more detailed spoken instructions using advanced TTS computer voice technology. TTS converts written text into a computer generated voice to pronounce street names and other announcements.

TTS voices are indicated with an asterix.
GPS

Your BMW Link will automatically use your phone’s built-in GPS receiver for navigation or the built-in GPS receiver of the BMW Link Station.

BMW Link relies on GPS satellite signals to locate you on the map and to provide turn-by-turn guidance to your destination. To check the current status of your phone’s GPS reception, select Settings > GPS.

The GPS Status screen displays the information received from your phone’s GPS receiver. You can see your current latitude and longitude position, the UTC time and date, your speed and your elevation.

GPS Performance

It’s important that the location, date and time are set correctly on your phone to ensure that the GPS information you receive is accurate. The first time you use a GPS receiver it may take a few minutes to determine your current position. In future, your position will be found much faster.

To ensure you have the best possible GPS reception, make sure that your phone has a clear line of sight to the sky. Large objects, like big trees and tall building, can sometimes interfere with your phone’s GPS signal.

BMW Link can use enhanced positioning technology to provide continued guidance when you’re driving in a tunnel. The In tunnel mode icon will be displayed.

You will not be able to get a GPS signal inside buildings, garages, multi-storey and basement car parks.
Sounds

BMW Link makes the following kinds of sounds:

- Spoken instructions
- Warning sounds
- Button sounds

To adjust the sounds played by your BMW Link, tap Settings > Sound.

Change the volume level

You can adjust the volume level of your BMW Link using volume buttons on your phone or the volume control of your car radio if you use the BMW Link Station for iPhone.

Choose Mute, to turn off all BMW Link navigation sounds. When set to mute, BMW Link doesn’t provide any spoken instructions, alerts or button sounds.

Button sounds

Choose button click sounds to turn on and off the click sounds that play every time you touch a button in the navigation.

Change the way BMW Link provides spoken instructions when music is playing

You can set how BMW Link plays spoken instructions when you’re also listening to music on your iPhone. Choose from the following four options:

- Mute music during voice prompt
- Reduce music volume during voice prompt
- Play same volume for music and voice prompt
- No voice prompts whilst music is playing
Units of Measure

To set your preferences for the type of units of measurement used in maps and instructions, tap **Units of Measure**.

Choose from **Imperial** (distances in miles) and **Metric** (Kilometres)

BMW Link Info

Provides details about the software version, maps, Points of Interest, product key and serial number of your BMW Link.
