BMW WIFI HOTSPOT.

The BMW WiFi Hotspot offers the following services:

Always on – the Internet makes life easier, not only at home and in the office, but also and in particular when you are on the move. Wouldn't it be great to be able to surf as conveniently when out and about as you do when at home? Reliably, securely and quickly without using up your smartphone data allowance? This is precisely what the BMW WiFi Hotspot delivers.

Accessing the BMW WiFi Hotspot:

- 1. The customer orders a BMW with the optional extra Telephony with Wireless Charging. -> The car is delivered with a Wi-Fi module.
- 2. Registration at BMW ConnectedDrive (www.bmw-connecteddrive.com) only if the customer wishes to change the vehicle's home country.
- 3. In the car: The customer connects their device to the Wi-Fi by entering the security code generated by the car.
- 4. Upon entering a Web address, the customer is redirected to the HotSpot Drive website.
- 5. The customer registers only once.
- 6. The customer books an access tariff (HotSpot Drive Start) via the HotSpot Drive website, selects their method of payment and starts to surf.

ACTIVATING THE BMW WIFI HOTSPOT.

Select 'Communication' in your control display.

Select 'Manage mobile devices'.

ACTIVATING THE BMW WIFI HOTSPOT.

Select 'Connect new device'.

Select 'Internet hotspot'. The BMW WiFi Hotspot is activated automatically.

ACTIVATING THE BMW WIFI HOTSPOT.

Your Internet hotspot has now been activated and you can connect your mobile device to it. You have a two-minute window in which to do so. Naturally, each device only needs to be registered once – just like at home.

BMW WIFI HOTSPOT SETTINGS.

Select 'Settings'.

You can activate or deactivate the Internet hotspot here and can also change the hotspot name and security code using the 'Options' button.
