with certain precursors that are bound in polymers. Additional Information: Certain inorganic oxides are bound in glass or ceramic matrices that change their individual substance properties as well as their communication duties under REACH. Similar changes occur in coatings, paints and filters).

Bis(2-(2-methoxyethoxy)ethyl)ether, tetraglyme (typically as process solvent)

1,3,5-Tris(oxiran-2-ylmethyl)-1,3,5-triazinane-2,4,6-trione, TGIC (typically for production of plastics and rubbers)

Diazene-1,2-dicarboxamide, ADCA (typically as blowing agent in plastic and rubber manufacturing)

Silicic acid, lead salt (typically for production of glass and ceramics)  Heating and air conditioning (Heater with control, seat heating)

Diboronic trioxide (typically for production of borosilicate and crystal glass) Location of article containing the substances in the product (Detailed, including optional equipment)

Boric acid (typically for production of glass and ceramics and as flame retardant) Electronic (Switch, sensor)

Nonylphenol (typically as dispersing agent in coatings, adhesives and paints) Powertrain (Fuel tank with filler pipe)  Heating and air conditioning (Air and water lines) Powertrain (Fuel tank with filler pipe, Injection control unit, Manual transmission, Variable valve train, Ventilation, evaporation emission control)

4,4'-Isopropylidenediphenol (typically for production of polymers and resins) Electronic (Windshield washer unit)

4,4'-Isopropylidenediphenol (typically as process solvent and for surface treatment)

1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDEME (typically as process solvent and for surface treatment)

2-Methyl-1-(4-methylthiophenyl)-2-morpholinopropan-1-one (typically used in lubricants)

S-(Tricyclo(5.2.1.0'2,6)deca-3-en-8(or 9)-yl O-(isopropyl or isobutyl or 2-ethylhexyl) O-

Melamine (typically used in coatings, paints and filters)

Silicic acid, lead salt (typically for production of glass and ceramics) Electronic (Windshield washer unit)

Boric acid (typically for production of glass and ceramics and as flame retardant) Electronic (Switch, sensor)

Nonylphenol (typically as dispersing agent in coatings, adhesives and paints) Powertrain (Fuel tank with filler pipe)  Heating and air conditioning (Air and water lines) Powertrain (Fuel tank with filler pipe, Injection control unit, Manual transmission, Variable valve train, Ventilation, evaporation emission control)

4,4'-Isopropylidenediphenol (typically for production of polymers and resins) Electronic (Switch, sensor)

4-Nonylphenol, branched and linear, ethoxylated (typically as dispersing agent in coatings, adhesives and paints)

Diboron trioxide (typically for production of borosilicate and crystal glass) Location of article containing the substances in the product (Detailed, including optional equipment)

Boric acid (typically for production of glass and ceramics and as flame retardant) Electronic (Windshield washer unit)

Nonylphenol (typically as dispersing agent in coatings, adhesives and paints) Powertrain (Fuel tank with filler pipe)  Heating and air conditioning (Air and water lines) Powertrain (Fuel tank with filler pipe, Injection control unit, Manual transmission, Variable valve train, Ventilation, evaporation emission control)

4,4'-Isopropylidenediphenol (typically for production of polymers and resins) Electronic (Switch, sensor)

4-Nonylphenol, branched and linear, ethoxylated (typically as dispersing agent in coatings, adhesives and paints)

Diboron trioxide (typically for production of borosilicate and crystal glass) Location of article containing the substances in the product (Detailed, including optional equipment)

Boric acid (typically for production of glass and ceramics and as flame retardant) Electronic (Windshield Washer unit)

Nonylphenol (typically as dispersing agent in coatings, adhesives and paints) Powertrain (Fuel tank with filler pipe)  Heating and air conditioning (Air and water lines) Powertrain (Fuel tank with filler pipe, Injection control unit, Manual transmission, Variable valve train, Ventilation, evaporation emission control)

4,4'-Isopropylidenediphenol (typically for production of polymers and resins) Electronic (Switch, sensor)

4-Nonylphenol, branched and linear, ethoxylated (typically as dispersing agent in coatings, adhesives and paints)

Diboron trioxide (typically for production of borosilicate and crystal glass) Location of article containing the substances in the product (Detailed, including optional equipment)

Boric acid (typically for production of glass and ceramics and as flame retardant) Electronic (Windshield washer unit)
