Certain inorganic oxides are bound in glass or ceramic matrices that change their individual properties as well as their communication duties under REACH. Similar changes occur with certain precursors that are bound in polymers.

The information provided in this document related to material and substance content represents our knowledge and belief, which may be based in whole or in part on available information provided by suppliers to us.

### Examples of substances:

- **S-(Tricyclo(5.2.1.0\(^\text{2,6}\))deca-3-en-8(or 9)-yl O-(isopropyl or isobutyl or 2-ethylhexyl) O-**
  - products, adhesives and sealants
- **Dibutylbis(pentane-2,4-dionato-O,O')tin** (typically for production of polymers, coating products)
- **Lead titanium zirconium oxide** (typically as constituent of electronic components)
- **2-benzyl-2-dimethylamino-4'-morpholinobutyrophenone** (typically for adhesives, sealants, diene, "Dechlorane Plus"™ (typically as flame retardant)
- **1,6,7,8,9,14,15,16,17,17,18,18-Dodecachloropentacyclo[12.2.1.16,9.02,13.05,10]octadeca-7,15-dimethylcyclohexasiloxane** (typically as feedstock for the production of silicone polymers)
- **Dicyclohexyl phthalate** (typically as plasticizer for production of polymers)
- **Silicic acid, lead salt** (typically for production of glass and ceramics)
- **Boric acid** (typically for production of glass and ceramics and as flame retardant)
- **Decamethylcyclopentasiloxane** (typically as feedstock for the production of silicone polymers)
- **Dichloromethylphthalate** typically as plasticizer for production of polymers
- **Nonylphenol, branched and linear, ethoxylated** typically as dispersing agent in coatings, adhesives and paints
- **Diboron trioxide** (typically for production of borosilicate and crystal glass)
- **Octamethylcyclotetrasiloxane** (typically as feedstock for the production of silicone polymers)
- **1,6,7,8,9,14,15,16,17,18,19-Dodecahydrocyclopenta[a]phenanthrene** (typically as feedstock for the production of silicone polymers and coatings)
- **Medium-chain chlorovinylated polyacetals** (typically as flame retardant and as additive in plastics, sealants, rubber, textiles)
- **Lead tetracarbonyl oxide** (typically as constituent of electronic components)
- **Bis(2-methylphenyl)phosphine** (typically used in lubricants)
- **Silicon tetrachloride** (typically used in the production of silicone polymers, coating products, adhesives and sealants)

### Communication of information according to Article 33 REACH

- **Name of substance meeting the criteria in Article 37 and identified in accordance with Article 59(1) in a concentration above 0.1% weight by weight (Typical use according to the REACH Annex XV Dossier)**
- **Location of article containing the substance in the product (Detailed, including optional equipment)**
- **Article 59(1) in a concentration above 0.1% weight by weight (Typical use according to the REACH Annex XV Dossier)**
- **REACH Annex XV Dossier**
- **Name of substance meeting the criteria in Article 57 and identified in accordance with Article 59(1) in a concentration above 0.1% weight by weight (Typical use according to the REACH Annex XV Dossier)**
- **REACH Annex XV Dossier**
- **Powertrain (Vacuum pump)**
- **Drive Assistance (Radio-controlled locking system)**
- **Electronic (Antenna)**
- **Heating and air conditioning (Heater with control)**
- **Electronic (Fog lights, front auxiliary lighting)**
- **Electronic (Control units, moduls)**
- **Electronic (Control units, moduls)**
- **Electronic (Switch, sensor)**
- **Electronic (Control units, moduls, Fog lamps, additional lamps, Front lamp cluster, Horn, Inner lights, Instrument cluster, Switch, sensor)**
- **Electronic (Front suspension, Rear wheels, Headlight)**
- **Electronic (Control units, moduls, Fog lamps, additional lamps, Front lamp cluster, Horn, Inner lights, Instrument cluster, Switch, sensor)**
- **Electronic (Control units, moduls)**
- **Electronic (Control units, moduls, Fog lamps, additional lamps, Front lamp cluster)**
- **Electronic (Control units, moduls)**
