with certain precursors that are bound in polymers.

Additional Information: Certain inorganic oxides are bound in glass or ceramic matrices that change their individual substance properties as well as their communication duties under REACH. Similar changes occur

The information provided in this document related to material and substance content represents our knowledge and belief, which may be based in whole or in part on available information provided by suppliers to us.

DOTE (typically for production of paints and polymers)

2,2',6,6'-tetrabromo-4,4'-isopropylidenediphenol (typically as flame retardant and as

Octamethylcyclotetrasiloxane (typically as feedstock for the production of silicone

Hexahydromethylphthalic anhydride (typically for production of resins and polymers)

Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

polymers)

4,4'-Isopropylidenediphenol (typically for production of polymers and resins)

coatings, paints and fillers)

6,6'-Di-tert-butyl-2,2'-methylenedi-p-cresol (typically for production of polymers and

1,3-Propanesultone (typically as electrolyte in batteries)

solvent and for surface treatment)

Hexahydro-4-methylphthalic anhydride (typically for production of resins and polymers)

Bis(2-(2-methoxyethoxy)ethyl)ether, tetraglyme (typically as process solvent)

DOTE (typically for production of paints and polymers)

2-Methyl-1-(4-methylthiophenyl)-2-morpholinopropan-1-one (typically used in

rubbers)

1,3-Propanesultone (typically as electrolyte in batteries)

solvent and for surface treatment)

Lead removable, lead solid (typically as constituent of electronic components)

Now only typical for production of glue and escutcheon of armrest and door panels

Decamethylcyclopentasiloxane (typically as feedstock for the production of silicone

Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone

Diboron trioxide (typically for production of borosilicate and crystal glass)

Lead monoxide, lead oxide (typically as constituent of electronic components)

Electronic (Instrument cluster)

Body (Boot lid latch, locks and fittings)

Electronic (Head-up Display)

Powertrain (Automatic transmission, Charge air cooler with mounting, Fuel tank with

Interieur (Front seats, Mirrors, sun visors, ashtrays, trays)

Communication (Off-hands mobile communication)

Electronic (Cable harness)

Body (Airbags, Colours, paints and basic material)

Chassis (Accelerator foot control)

Electronic (Front lamp cluster)

Drive Assistance (Radio-controlled locking system)

Location of article containing the substance in the product (Detailled, including optional

BMW M8 Coupé (DATE 04/2023)

Electronic (Instrument cluster)

Body (Boot lid latch, locks and fittings)

Electronic (Control units, moduls, Front lamp cluster, Head-up Display, Instrument

Electronic (Control units, moduls)

Body (Door locks, grab handles and front fittings, Window mechanism with electrical

Electronic (Control units, moduls, Front lamp cluster, Head-up Display, Instrument

Electronic (Head-up Display)

Powertrain (Ignition coil)

Body (Boot lid latch, locks and fittings)

Drive Assistance (Radio-controlled locking system, Rear view camera)

Body (Boot lid latch, locks and fittings)

Wheels and tires (Car wheels)

Drive Assistance (Radio-controlled locking system)

Wheels and tires (Car wheels)

Drive Assistance (Radio-controlled locking system)

Body (Bodyshell, Bonnet latch, locks and fittings)

Drive Assistance (Radio-controlled locking system, Time-to-line crossing external camera)

Body (Airbags, Colours, paints and basic material)

Chassis (Anti-lock system, Lateral moment distribution rear axle, Self-levelling

elements for hydropneumatic system electrical components, Steering column, Steering

Electronic (Control units, moduls, Front lamp cluster, Head-up Display, Instrument

2,2'-6,6'-tetrabromo-4,4'-isopropylidenediphenol (typically used in

8-Methyl-2-(2-methylpropyl)-5-oxo-1,3-dioxaspiro[5.5]undecane (typically as

3,3'-Dibromo-5,5'-dihydroxybiphenyl (typically as feedstock for the production of silicone

Dihydroxyethylsilicone (typically as feedstock for the production of silicone

3,3'-di-propyl-4,4'-biphenyl (typically as precursors to production of polyesters and

2,2'-dihydroxy-4,4'-biphenyl (typically for production of polyesters and

4,4'-biphenyl (typically for production of polyesters and

1,1,1,3,3,3-hexamethyldisiloxane (typically as feedstock for the production of silicone

1,4-Bis(2-methoxyethoxy)ethane (typically as plasticizer for production of polymers)

1,4-Bis(2-methoxyethoxy)ethane (typically as plasticizer for production of polymers)

Octamethylcyclotetrasiloxane (typically as feedstock for the production of silicone

Hexahydromethylphthalic anhydride (typically for production of resins and polymers)

Decamethylcyclopentasiloxane (typically as feedstock for the production of silicone

Decamethylcyclopentasiloxane (typically as feedstock for the production of silicone

Dicyclohexyl phthalate (typically as plasticizer for production of polymers)
