with certain precursors that are bound in polymers.

Potassium 1,1,2,2,3,3,4,4,4-nonafluorobutane-1-sulfonate (typically as flame retardant in polycarbonate)

2,3-dibromo-1-propanol, 2,3-DBPA (typically as an intermediate in the manufacture of 2-benzyl-2-dimethylamino-4'-morpholinobutyrophenone (typically for adhesives, and paints)

4-Nonylphenol, branched and linear (typically as dispersing agent in coatings, adhesives)

Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone manufacturing)

Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

4,4'-Isopropylidenediphenol (typically for production of polymers and resins)

2-Methylimidazole (typically as hardener in epoxy resins and for production of rubbers)

1,3-Propanesultone (typically as electrolyte in batteries)

2-Ethoxyethyl acetate (typically for production of paints and polymers)

Silica acid, lead salt (typically for production of glasses and ceramics)

Silica oxide (typically for production of glasses and ceramics)

Dichloromethylphosphonocarbonate (typically as feedstock for the production of silicone polymers)

Hydrobromic acid (typically as plasmochemical for production of polyesters)

Dodecanedioylphthalic anhydride (typically as feedstock for the production of polyesters)
