### Hexahydro-4-methylphthalic anhydride (typically for production of resins and polymers)

### DOTE (typically for production of resins and polymers)

### 2-benzyl-2-dimethylamino-4'-morpholinobutyrophenone (typically used in sealants, coatings and inks)

### Medium-chain chlorinated paraffins (as plasticizer in plastic and rubber manufacturing)

### 4,4'-Isoproplyldenediphenol (typically as flame retardant and as additive in plastics and resins)

### 1,3-Propanesultone (typically as electrolyte in batteries)

### Diazene-1,2-dicarboxamide, ADCA (typically as blowing agent in plastic and rubber manufacturing)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)

### Diboron trioxide (typically for production of borosilicate and crystal glass)

### 2-Methyl-1-(4-methylthiophenyl)-2-morpholinopropan-1-one (typically used in coatings, paints and filters)

### Imidazolidine-2-thione (typically for production of polymers and rubbers)

### Dichloromethane (typically for production of glass and ceramics)

### 1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDE (typically as process solvent and for surface treatment)

### 1,3-Propanesulfonate (typically as electrolyte in batteries)

### 2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)

### Silicic acid, lead salt (typically for production of glass and ceramics)

### Lead monoxide, lead oxide (typically as constituent of electronic components)

### Boric acid (typically for production of glass and ceramics and as flame retardant)

### Decamethylcyclosiloxane (typically as feedstock for the production of silicone polymers)

### Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)

### 1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDE (typically as process solvent and for surface treatment)

### 1,3-Propanesulfonate (typically as electrolyte in batteries)

### 2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)

### Silicic acid, lead salt (typically for production of glass and ceramics)

### Lead monoxide, lead oxide (typically as constituent of electronic components)

### Boric acid (typically for production of glass and ceramics and as flame retardant)

### Decamethylcyclosiloxane (typically as feedstock for the production of silicone polymers)

### Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)

### 1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDE (typically as process solvent and for surface treatment)

### 1,3-Propanesulfonate (typically as electrolyte in batteries)

### 2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)

### Silicic acid, lead salt (typically for production of glass and ceramics)

### Lead monoxide, lead oxide (typically as constituent of electronic components)

### Boric acid (typically for production of glass and ceramics and as flame retardant)

### Decamethylcyclosiloxane (typically as feedstock for the production of silicone polymers)

### Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)

### 1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDE (typically as process solvent and for surface treatment)

### 1,3-Propanesulfonate (typically as electrolyte in batteries)

### 2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)

### Silicic acid, lead salt (typically for production of glass and ceramics)

### Lead monoxide, lead oxide (typically as constituent of electronic components)

### Boric acid (typically for production of glass and ceramics and as flame retardant)

### Decamethylcyclosiloxane (typically as feedstock for the production of silicone polymers)

### Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)

### 1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDE (typically as process solvent and for surface treatment)

### 1,3-Propanesulfonate (typically as electrolyte in batteries)

### 2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)

### Silicic acid, lead salt (typically for production of glass and ceramics)

### Lead monoxide, lead oxide (typically as constituent of electronic components)

### Boric acid (typically for production of glass and ceramics and as flame retardant)

### Decamethylcyclosiloxane (typically as feedstock for the production of silicone polymers)

### Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)

### 1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDE (typically as process solvent and for surface treatment)

### 1,3-Propanesulfonate (typically as electrolyte in batteries)

### 2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)

### Silicic acid, lead salt (typically for production of glass and ceramics)

### Lead monoxide, lead oxide (typically as constituent of electronic components)

### Boric acid (typically for production of glass and ceramics and as flame retardant)

### Decamethylcyclosiloxane (typically as feedstock for the production of silicone polymers)

### Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)

### 1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDE (typically as process solvent and for surface treatment)

### 1,3-Propanesulfonate (typically as electrolyte in batteries)

### 2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)

### Silicic acid, lead salt (typically for production of glass and ceramics)

### Lead monoxide, lead oxide (typically as constituent of electronic components)

### Boric acid (typically for production of glass and ceramics and as flame retardant)

### Decamethylcyclosiloxane (typically as feedstock for the production of silicone polymers)

### Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)

### 1,2-Dimethoxyethane, ethylene glycol dimethyl ether, EGDE (typically as process solvent and for surface treatment)

### 1,3-Propanesulfonate (typically as electrolyte in batteries)

### 2-Methylimidazole (typically as hardener in epoxy resins and for production of adhesives)

### Silicic acid, lead salt (typically for production of glass and ceramics)

### Lead monoxide, lead oxide (typically as constituent of electronic components)

### Boric acid (typically for production of glass and ceramics and as flame retardant)

### Decamethylcyclosiloxane (typically as feedstock for the production of silicone polymers)

### Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

### Dodecamethylcyclohexasiloxane (typically as feedstock for the production of silicone polymers)
