The BMW Group is committed to sustainable principles and therefore takes active steps to reduce the environmental impact of its products. Due to that only substances that are technically required in the product are used. The substances are incorporated in such a way that potential exposure to the consumer is minimized and the environment can be protected as far as possible. Certain oxides are bound in glass or ceramic matrices that change their individual substance properties as well as their communication duties under REACH. Similar changes occur in paints, coatings, adhesives and coatings (typically used in coatings, paints andinks)

Dodecachloropentacyclo[12.2.1.16,9.02,13.05,10]octadeca-7,15-diene, “Dechlorane polymers)

Imidazolidine-2-thione (typically for production of polymers and rubbers)

Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

Decamethylcyclopentasiloxane (typically as feedstock for the production of silicone polymers)

Boric acid (typically for production of glass and ceramics and as flame retarder)

Decamethylcyclopentasiloxane (typically for the production of silicone polymers)

Dicyclohexyl phthalate (typically as plasticizer for production of polymers)

Dodecachloropentacyclo[12.2.1.16,9.02,13.05,10]octadeca-7,15-diene, “Dechlorane pharmaceuticals (typically for the production of silicone polymers)

4-Nonylphenol, branched and linear (typically as dispersing agent in coatings, adhesives and paints)

Bis(4-chlorphenyl)sulfone (typically for production of polymers and rubbers)

4-Isopropyl-2,4,6-trinitrotoluene (typically as flame retardant in plastic and rubber manufacturing)

Interieur (Front seats, Mirrors, sun visors, ashtrays, trays)

Entertainment and Navigation (Radio, amplifier, CD-player)

Electronic (Brake lights, Control units, moduls, High voltage charging electronics, High-voltage accumulator system, High-voltage charging electronics)

Powertrain (Fuel tank with filler pipe, Housing ventilation, Injection control unit, Injection nozzles, Canister ventilation, Coolant pump with drive, Electronic switching or control devices, Sensor for injection control unit, Supercharging contrivance with regulation, Switch and relays)

Electronic (Brake lights, Control units, moduls, High voltage charging electronics, High-voltage accumulator system, High-voltage charging electronics, High-voltage accumulator system, High-voltage charging electronics)

Powertrain (Exhaust gas recirculation, Thermostat and engine mounted cooling lines)

Powertrain (Alternator with drive and mountings, Engine cooler with mounting, Housing cover, Oil cooler lines, Oil filler lines, Thermostat and engine mounted cooling lines, Variable valve train, Ventilation, evaporation control system)

Electronic (Brake lights, Control units, moduls, High voltage charging electronics, High-voltage accumulator system, High-voltage charging electronics)

Powertrain (Alternator with drive and mountings, Engine cooler with mounting, Housing cover, Oil cooler lines, Oil filler lines, Thermostat and engine mounted cooling lines, Variable valve train, Ventilation, evaporation control system)

Electronic (Brake lights, Control units, moduls, High voltage charging electronics, High-voltage accumulator system, High-voltage charging electronics, High-voltage accumulator system, High-voltage charging electronics)

Powertrain (Alternator with drive and mountings, Engine cooler with mounting, Housing cover, Oil cooler lines, Oil filler lines, Thermostat and engine mounted cooling lines, Variable valve train, Ventilation, evaporation control system)

Electronic (Brake lights, Control units, moduls, High voltage charging electronics, High-voltage accumulator system, High-voltage charging electronics, High-voltage accumulator system, High-voltage charging electronics)
